## Sub Zero Nitrogen Ice Cream

Rethink the way you experience gourmet ice cream with Utah-based newcomer Sub Zero. Making science delicious with the help of liquid nitrogen, the freezer-free eatery gets creative juices flowing by allowing customers to mix and match flavors and mix-ins from amaretto to waffle cone bits, to come up with their own equation for the perfect sweet treat before hand-mixing and flash freezing it to -321 degrees. The result is a smoother, creamier and denser delight than ever before.
